# ENJOYING SMART LIVING WHATEVER YOUR HOUSE TYPES

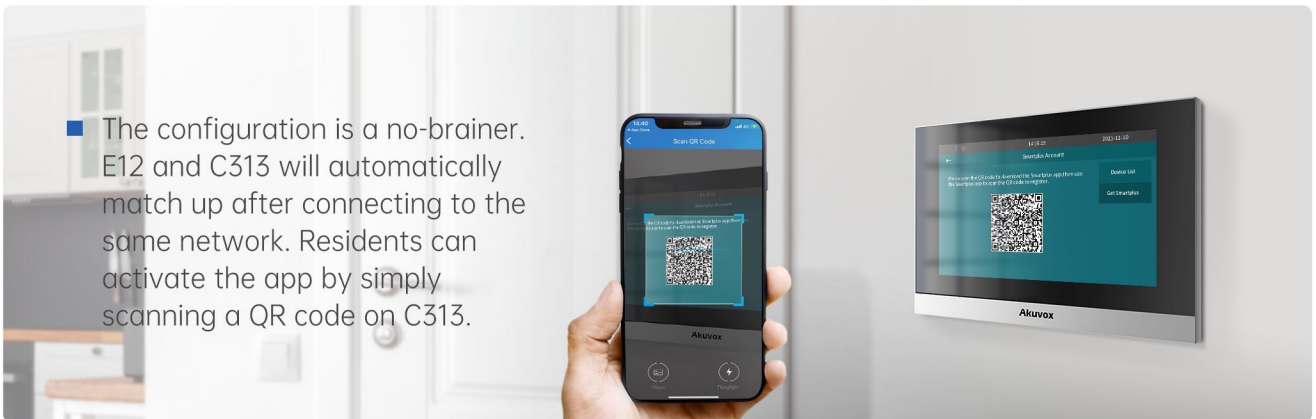

- The tech-forward door phone brings a modern look to your home. It features motion detection with an app push notification, letting you keep an eye on the front door anywhere.

- You can see and talk to visitors and unlock doors for them via the indoor monitor or the intuitive app on your smartphone.

- When there are multiple rooms in one's home, additional indoor monitors can be added to enable convenient room-to-room communication.

- The configuration is a no-brainer. E12 and C313 will automatically match up after connecting to the same network. Residents can activate the app by simply scanning a QR code on C313.

# SOLUTION OVERVIEW

## FOR VILLAS

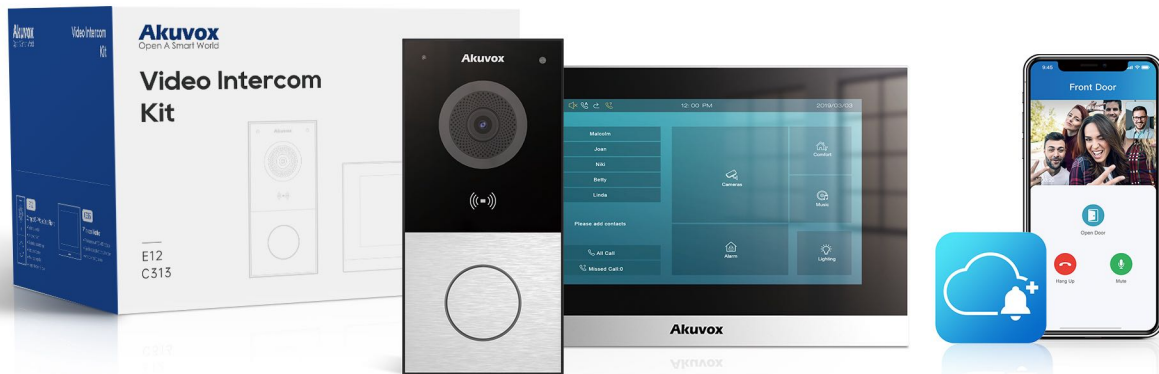

## FOR APARTMENTS

# AKUVOX SMART INTERCOM KIT

Open A Smart World

## E12

### Compact SIP Video Door Phone

- Real-time 2-way talk
